

MOUNTING ACCESSORIES

NovaBlade Flush Mount Frame

The flush mount frame brings the T-bar fit into plasterboard ceilings. It's the neatest way to have great light on hand without a luminaire in sight. It fits flush with the ceiling and requires as little as 150mm clearance in the ceiling. Once installed, the NovaBlade just drops in as with a T-Bar ceiling grid.

Part No	Size
LL9P33FK	295 x 295mm
LL9P63FK	595 x 295mm
LL9P66FK	595 x 595mm
LL9P123FK	1195 x 295mm
LL9P126FK	1195 x 595mm

Note: The opening requires timber framing to meet building regulations.

NovaBlade Surface Mount Frame

The semi-flush mount is for those more awkward places where structural or other considerations make flush mounting impossible. Just mount the base, insert the NovaBlade and close the patented sliding gate. The finished result is a protrusion of only 15mm.

Part No	Size
LL9P33SK	295 x 295mm
LL9P63SK	595 x 295mm
LL9P66SK	595 x 595mm
LL9P123SK	1195 x 295mm
LL9P126SK	1195 x 595mm

Safety cables are included as they may be required for some applications.

NovaBlade Semi Flush Mount Frame

The semi-flush mount is for those more awkward places where structural or other considerations make flush mounting impossible. Just mount the base, insert the NovaBlade and close the patented sliding gate. The finished result is a protrusion of only 15mm.

Part No	Size
LL9P33SFK	295 x 295mm
LL9P63SFK	595 x 295mm
LL9P66SFK	595 x 595mm
LL9P123SFK	1195 x 295mm
LL9P126SFK	1195 x 595mm

Safety cables are included as they may be required for some applications.

NovaBlade Pendant Mount Kits

Suspended mounting is sometimes a good option for task areas or high ceilings. There are two models in the NovaBlade pendant mount range, one where the driver can be contained in the top canopy, and one that's smaller and neater for when the driver can be located elsewhere.

A LL9PC15 low voltage driver extension cable is included. Each kit has stainless steel hanger cables and clamps for easy levelling. Standard hanger cable length is 1M. Longer lengths available to special order.

Part No	Size
LL9PPK	Deep Canopy Type
LL9PPKS	Shallow Canopy Type

Note: The opening requires timber framing to meet building regulations.
