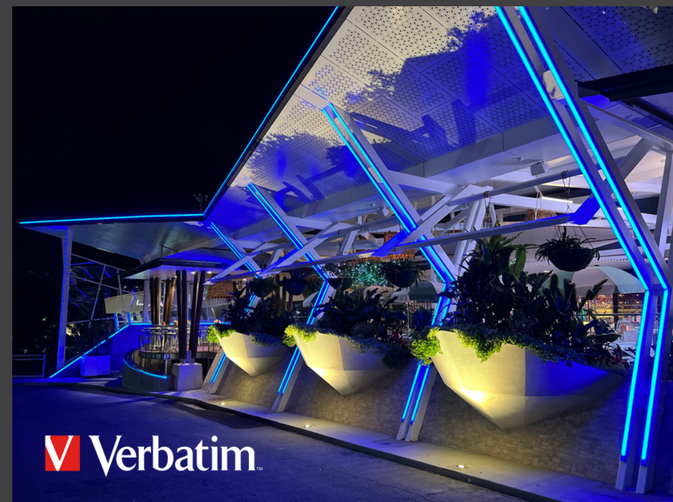
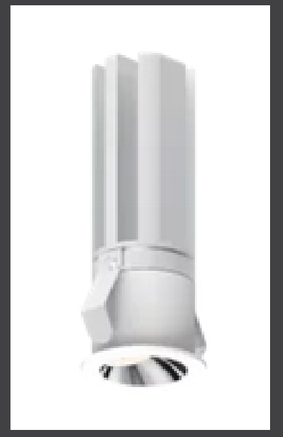
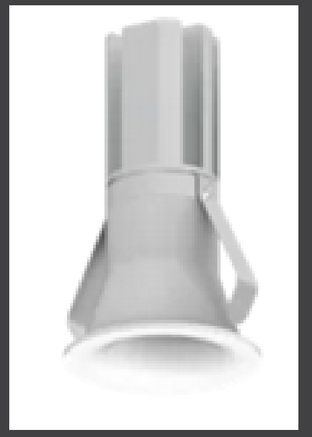
range overview

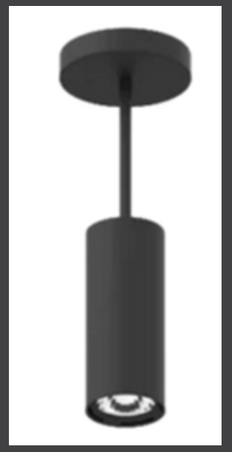


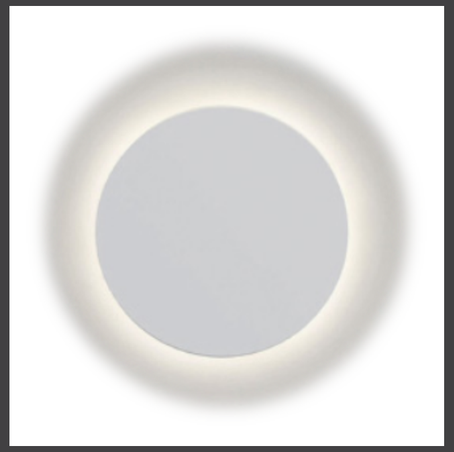
forlite

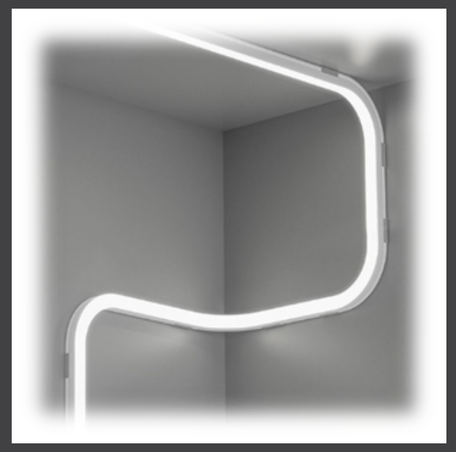
architectural lighting











axis range

transform your space into a captivating destination with forlite's artere axis range of LED strip lighting. products in the artere axis range bend horizontally and vertically, allowing complex irregular shapes, unlike previous generations which could only bend on one axis. with options for IP54 or IP67, they are perfect for both indoor and outdoor illumination.

whether it's a residential space, retail store, restaurant, office, or hotel, our flexible LED strip lights add a touch of elegance that leaves a lasting impression. the range includes CCT options for static white, tunable white, RGBW and pixel RGBW, and offers various mounting options for ultimate flexibility of installation.

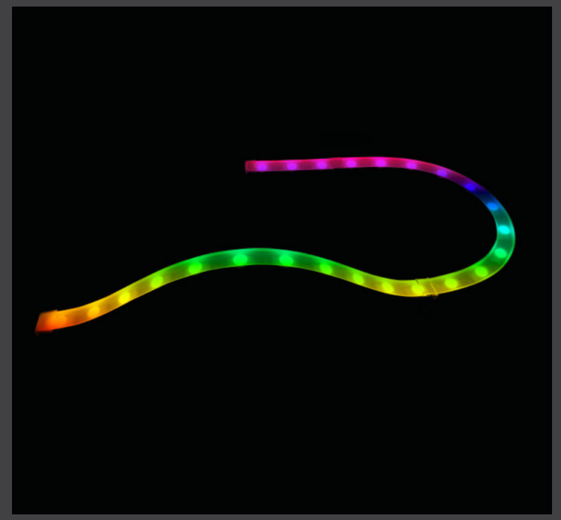
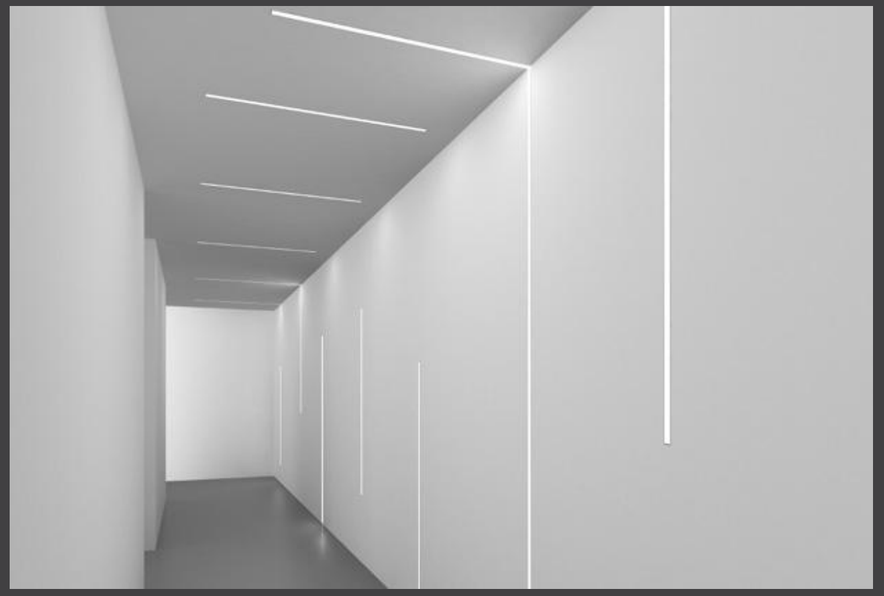
axis 16

axis 23



axis 23 pro



- 6 or 9W/m
- supplied in lengths < 10m
- no predefined cutting intervals
- IP54
- static white
- comes with trim for recessing into furniture & other architectural elements

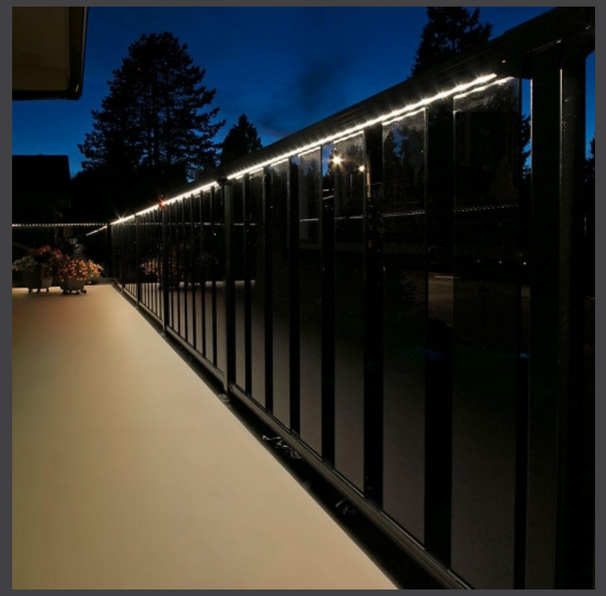
axis 6

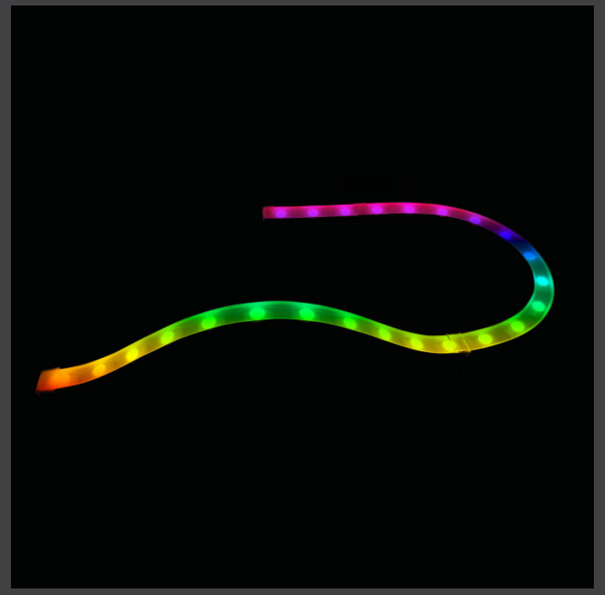
axis 16

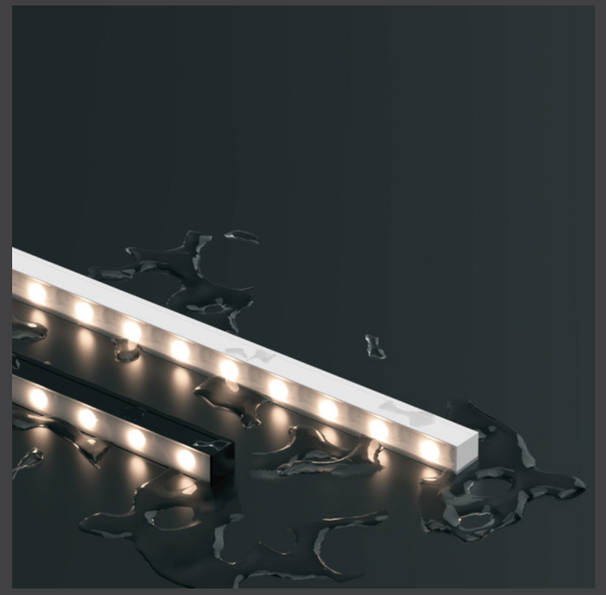
- 14W/m
- supplied in lengths < 10m
- no predefined cutting intervals
- IP67
- static white or tunable white
- bracket, clip, extrusion & flexible mounting options

- 18W/m
- supplied in lengths < 10m
- no predefined cutting intervals
- IP67
- static white, tunable white, RGBW & pixel RGBW
- bracket, clip, extrusion & flexible mounting options

axis 23







axis 23 pro

- 18W/m
- 250mm or 500mm cutting intervals
- IP67 & IK07
- individual optics provide a more concentrated light source
- static white, tunable white, RGBW & pixel RGBW
- bracket, clip, extrusion & flexible mounting options

axis projects
